AREA TECNICA / TECHNICAL AREA

N.C.S.  * Nordic Click System di rilascio con un Click. <i>N.C.S. Nordic Click System - quick nordic strap release.</i>	FAST LOCK  Sistema di bloccaggio esterno ideale anche a basse temperature. <i>Fast and safe external locking system, ideal for low temperatures.</i>	WIRED  Sistema di chiusura rapido per un bastoncino super compatto. <i>Quick folding system for a very compact pole</i>
T.C.S.  * Top Click System Lacciolo regolabile e rimovibile. <i>Removable automatic strap adjustment.</i>	A.I.  * Anti Impact Assorbe le vibrazioni dannose. <i>Absorbs harmful vibrations.</i>	S-CARBON  Snake Carbon Carbonio ad alto modulo a geometria speciale. <i>Special high module carbon fiber with special geometry.</i>
SOFT  impugnatura traspirante e leggera. <i>Soft and light grip.</i>	T.P.L.  * Top Performance Locking Sistema di bloccaggio interno con due punti di attrito. <i>Internal locking system with two points of friction.</i>	CARBON  Tubi leggeri e resistenti in carbonio alto modulo. <i>Light and resistant carbon shafts.</i>
DIAMOND  Trattamento superficiale per dell'alluminio. <i>Aluminum surface treatment.</i>	L.L.S.  Light Locking System Sistema di bloccaggio interno. <i>Internal locking system.</i>	KEVLAR  Carbonio alto modulo rinforzato con Kevlar. Carbon HM reinforced with KEVLAR fibers.
ALOCS  Ossidazione superficiale protettiva dell'alluminio. <i>Aluminum oxide coating surface protection.</i>	TWIST LOCK  * Sistema di chiusura rapido brevettato. <i>Patented quick compacting system.</i>	CARBIDE  Puntale in tungsteno. <i>Carbide tip.</i>
ULTRA LIGHT  Rapporto peso lunghezza speciale <i>Ultralight poles with superior length/weight ratio.</i>	U-LOCK  Ultra Lock Sistema di bloccaggio ad alte performance con leva in alluminio. <i>High performance locking system with aluminum lever.</i>	* Brevettato. Patented.

TWIST LOCK

Twist Lock makes your poles compact! This locking system is operated through two simple, easy and intuitive steps. Just rotate by 90° degrees the lower section towards the open lock icon. Follow the instructions on the stick (open / closed padlock). In correspondence of the open lock, pulling outward, the lower section will be released from the top one. Once the lower section is released, this can be turned toward the upper one, making the stick compact. To put it back together, you just need to reinsert the lower section into the upper one, then rotate it toward the closed lock, with a 90° rotation. Once the different sections are locked, you can use your stick normally. The Twist Lock is interchangeable.

Twist Lock rende compatto il vostro bastoncino! Questo sistema di chiusura è azionabile attraverso due semplici gesti, facili ed intuitivi. Basta agire sul tubo principale del bastoncino, ruotando di 90° la sezione inferiore rispetto a quella superiore, osservando le indicazioni grafiche riportate nel tubo stesso (lucchetto aperto/chiuso). In corrispondenza del lucchetto aperto, tirando verso l'esterno, la sezione inferiore si sgancerà da quella superiore. Una volta rimossa, questa potrà essere girata su quella superiore, rendendo il bastoncino compatto. Per ricomporre il tutto, basterà reinserire la sezione inferiore su quella superiore, e ruotare la stessa nella direzione del lucchetto chiuso, con una rotazione di 90°. Una volta bloccate le varie sezioni, potrete utilizzare normalmente il vostro bastoncino. il Twist Lock è intercambiabile.

Twist Lock macht den Stöcke kompakt! Diese Verriegelung wird durch zwei einfache, leichte und intuitive Schritte betrieben. Gerade auf dem Hauptrohr des Stabes wirken, indem der untere Abschnitt 90° in Bezug auf die obere Abschnitt. Folgen Sie den Anweisungen auf dem Stöcke (offen / geschlossen Vorhängeschloss). In Übereinstimmung mit dem offenen Schloss und zog nach außen, wird der untere Abschnitt von der oberen Abschnitt freigegeben werden. Sobald der untere Abschnitt entfernt wird, kann diese in Richtung des oberen Abschnitt gedreht werden, so dass der Stick kompakt ist. Um das alles zusammen bringen, man muss nur den unteren Teil in die obere wieder einsetzen und drehen Sie ihn in die geschlossene Schloss, mit einer 90°-Drehung. Sobald die verschiedenen Abschnitte gesperrt sind, können Sie den Stöcke normal verwenden. Der Twist Lock ist austauschbar.

WIRED TECHNOLOGY

The innovative technology WIRED will allow you to collapse your pole, using a simple button. The different pole's sections are connected with a high-strength cable. The advantage of this technology is having a pole very compact, light, less bulky and easy to carry.

L'innovativa tecnologia WIRED vi permetterà di piegare il vostro bastoncino dopo l'uso per avere il minor ingombro possibile, utilizzando un semplice pulsante. Le diverse sezioni del bastoncino sono unite tra loro con

un cavo in acciaio rivestito in plastica. Il vantaggio di questa tecnologia è avere un bastoncino compatto, leggero, poco ingombrante e facilmente trasportabile.

Die innovative WIRED-Technologie ermöglicht es, den Stock auf ein sehr kompaktes Packmaß zu falten, einfach und schnell durch den Pinverschluss. Durch das Zeltstangenprinzip ist der Stock im Handumdrehen wieder einsatzbereit. Der Vorteil liegt im Rucksacktauglichen Packmaß und der einfachen Bedienung. Leicht, stabil, bewahrt.

SPRING FAST LOCK S.F.L.

The FAST LOCK system is based on the locking clamp principle, as a valid alternative to conventional systems. FAST LOCK does not require rotation of the tubes, but locks them through an external lever mechanism, and is fast and effective, even at low temperatures and when wearing gloves.

Il sistema FAST LOCK si basa sul principio della chiusura a morsetto, diventando una valida alternativa ai sistemi tradizionali. FAST LOCK non obbliga alla rotazione dei tubi ma li blocca attraverso un meccanismo a leva esterno, efficace e rapido anche a basse temperature e con l'uso dei guanti.

Das FAST LOCK System basiert auch dem Klemmbügel Prinzip, als eine stichhaltige Alternative zu konventionellen Systemen. Durch FAST LOCK muss man das Rohr nicht drehen, denn es wird durch einen außenliegenden Flachspannhebelmechanismus geschlossen. Dazu kommt, dass durch FAST LOCK eine schnelle und effektive Verstellung des Stockes auch bei niedrigen Temperaturen oder beim Tragen von Handschuhen gewährleistet wird.

U-LOCK

SNAKE CARBON

The recent "Snake Carbon" technology applied to the latest models developed by Gabel combines the excellent resistance of high modulus carbon fibre with a distinctive geometric structure, adding an innovative type of crystallisation technology. This process allowed to make the tubes 20% lighter, as well as boosting resistance by 18%. The combination of HD technologies with these new processes and materials has thus allowed us to introduce an outstanding new product onto the market.

La recente tecnologia "Snake Carbon" applicata agli ultimi modelli sviluppati da Gabel, unisce l'elevata resistenza del tessuto in carbonio ad alto modulo ad una particolare struttura geometrica, abbinata ad una innovativa tecnologia di cristallizzazione. Tale processo ha permesso la riduzione di peso dei tubi di circa il 20%, aumen-

tandone la resistenza del 18%. L'abbinamento, quindi, delle tecnologie HD con questi nuovi processi e materiali, ci ha consentito di introdurre nel mercato una novità di altissimo livello.

Die kürzlich entwickelte, bei den neuesten von Gabel ausgearbeiteten Modellen angewandte Technologie "Snake Carbon" verbindet die hohe Widerstandsfähigkeit des Carbon-Gewebes mit hohem Modul mit einer besonderen geometrischen Struktur, kombiniert mit einer innovativen Kristallisierungstechnologie. Dieses Verfahren ermöglichte die Verminderung des Gewichts der Rohre um ca. 20%, bei gleichzeitiger Erhöhung der Widerstandsfähigkeit um 18%. Die Kombination der HD-Technologien mit diesen neuen Verfahren und Materialien hat uns somit in die Lage versetzt, eine Neuheit auf höchstem Niveau auf den Markt bringen zu können.

ANTI IMPACT

ANTI IMPACT
ON/OFF SPRING SYSTEM

The anti-impact system patented by Gabel absorbs at its maximum vibrations caused by the collision with the ground and eliminates the transmission of the bad vibrations (lower than 100Hz). Gabel Anti-Impact: the best confort you can ask for.

L'Anti-Impact brevettato da Gabel assorbe al massimo gli urti dovuti all'impatto con il terreno, eliminando di fatto la trasmissione delle vibrazioni dannose (inferiori a 100Hz).

Gabel Anti-Impact: il confort al quale è difficile rinunciare.

Das patentierte Gabel Anti-Schlag-

System absorbiert maximal die Stöße und Vibrationen, die durch den Kontakt mit dem Boden verursacht werden, indem sie die schlechten Vibrationen (niedriger als 100Hz) eliminieren. Gabel Anti-Impact: Der Comfort, auf den du nicht verzichten kannst.

GABEL Anti Impact - Patented

What's behind our innovation

Many good things have been said about the use of adjustable Nordic Walking and Walking Poles for professional, recreational and healthcare use. GABEL have been at the forefront of many developments, particularly in relation to the ease and security of adjustment. We have now developed and patented a unique Anti Impact System which lessens the impact between pole and ground by reducing the jarring and prolonged vibration effect.

GABEL A.I. uses a micro cellular cushion similar to the material used by the automotive industry to dampen suspension systems. Most other brands use uncushioned springs for their anti shock system; this can cause prolonged vibration problems as it reacts like a bouncy ball. Some other systems have used elastic non metallic materials but their effectiveness has been limited and compromised by the relationship to the tube diameters.

The GABEL A.I. softly and quickly absorbs the impact vibration, providing the most effective solution to the reduction of wrist and elbow stress, particularly on hard surfaces and prolonged downhill stretches. All users will appreciate the high level of extra comfort provided by the GABEL Anti Impact System.

GABEL Anti Impact - Brevettato

Cosa c'è dietro la nostra innovazione

Si sono dette molte cose interessanti sull'uso professionale, ricreativo ed anche riabilitativo di bastoncini telescopici da passeggio e da Nordic Walking. GABEL è stata promotrice di molti sviluppi, particolarmente in relazione alla sicurezza e alla facilità di regolazione. Ha ora sviluppato e brevettato (in Italia, pat. pend. in altri paesi) un singolare sistema ammortizzante - Anti Impact (AI)- che attenua l'impatto tra bastone e terreno, e ne riduce fortemente l'effetto di vibrazione prolungata.

Il sistema GABEL A.I. usa un 'cuscino' micro-cellulare in materiale simile al quello usato nell'industria automobilistica per smorzare le sospensioni. La maggior parte degli altri sistemi disponibili fanno uso di semplici molle, mancando quindi di smorzamento: questo può causare problemi di vibrazioni prolungate, dato che tendono a comportarsi come una palla elastica reagisce ad un colpo. Alcuni altri sistemi usano elementi elastici non metallici, ma la loro efficacia è spesso limitata o compromessa nel tempo, per le restrizioni imposte dal diametro del tubo.

Il sistema GABEL A.I. assorbe velocemente e dolcemente la vibrazione dell'impatto, fornendo la soluzione più efficace alla riduzione dello stress a livello di polso e gomito, soprattutto in caso di esercizio prolungato su superfi-

cie dure e/o in discesa. Qualsiasi utente potrà trarre beneficio dall'extra confort offerto dal sistema GABEL A.I.

Manutenzione dei prodotti con Anti Impact

Non esistono particolari attenzioni od istruzioni da osservare per il sistema GABEL A.I. Il sistema di assorbimento è efficiente per tutta la vita del prodotto ed è "life time guaranteed". Le uniche due precauzioni necessarie sono:

Evitare che si sporchi l'interno della sez. diam. 18 (quella più grossa dove è fissata l'impugnatura) in modo che il tubo diam. 16 a cui è fissato il sistema GABEL A.I. possa scorrere facilmente.

Prestare molta attenzione nell'inserire la sezione centrale diametro 16. Infatti nell'inserimento si possono avere degli attriti all'imboccatura da provocare il disassamento delle due sezioni (diam. 16 e diam. 18) provocando la piegatura o rottura dello stelo filettato. Se questo si verificasse deve essere acquistata una nuova sezione di ricambio, disponibile presso il Vostro rivenditore di fiducia.

GABEL Anti Impact - Patented

Was steckt hinter unserer neuesten Innovation

Der längenverstellbare Nordic Walking Stock hat sich mittlerweile in seiner vielfältigen Anwendung auf Grund seiner Vorteile voll durchgesetzt. GABEL hat insbesondere was die Fixierung betrifft entscheidend daran mitgewirkt. Die neueste Innovation von GABEL ist das patentierte und exklusive Anti Impact. Dieses neuartige Dämpfung System reduziert entscheidend den beim Stock Einsatz auftretenden Stoß und die auftretenden Vibrations Schwingungen. Damit wird der gesamte Bewegungsapparat im Arm- und Schulterbereich entscheidend entlastet.

Das GABEL Anti Impact nutzt dabei als Dämpfungsmaterial einen Spezial Kunststoff wie er ähnlich im Automobil Bau für Stoßdämpfer eingesetzt wird. Die meisten anderen gefederten Trekking Stöcke benutzen im Gegensatz dazu eine Metall Feder. Dies kann eine verlängerte Vibration bedeuten und einen Trampolin Effekt erzeugen. Bei anderen Systemen die Kunststoff Dämpfungen verwenden, ist die Wirkung auf Grund des begrenzten Platzes, bedingt durch den geringen Rohrdurchmesser, begrenzt.

Das GABEL A.I. absorbiert dagegen die auftretenden Stöße schnell und weich. Es reduziert damit besonders effektiv die speziell auf hartem Untergrund und langen Abstiegen auftretenden Belastungen im Arm- und Schulterbereich.

Das neue GABEL Anti Impact mit seinem neuartigen Komfort wird deshalb auf Anhieb Jeden begeistern.

For those who demand lightness and reliability combined with optimal comfort.

The best in the market for rugged use!

Per chi richiede leggerezza e affidabilità unite ad un comfort eccezionale. I migliori nel mercato per usi estremi.

Für diejenigen, die Leichtigkeit und Verlässlichkeit kombiniert mit sehr gutem Komfort verlangen. Der beste auf dem Markt für einen rauen Einsatz.

Pour ceux qui demandent la légèreté et la fiabilité avec un confort extraordinaire. Les meilleurs sur le marché pour les utilisations extrêmes.

Para los que requieren ligereza y fiabilidad unidas a un conf

The ideal travel companion for all uses and for all seasons, with an eye for the youngest enthusiasts.

I compagni ideali per tutti gli usi e per tutte le stagioni, con un occhio di riguardo per gli appassionati più giovani.

Der Ideale Reisebegleiter für alle Anwender und für jede Jahreszeit, auch für jugendliche Enthusiasten.

Les compagnons idéals pour toutes les utilisations et pour toutes les saisons, avec une attention particulière pour les amateurs les plus jeunes.

For all those situations that require small size and minimum weight.

Maximum lightweight for exceptional performance.

Per tutte le situazioni che richiedono peso e dimensioni ridotte al minimo. Massima leggerezza per prestazioni eccezionali.

Für alle diese Situationen in denen ein kleines Packmaß kombiniert mit geringem Gewicht benötigt wird. Ein extremes Leichtgewicht für einen außergewöhnlichen Einsatz.

Pour toutes les situations qui demandent un poids et des dimensions réduits au minimum. La plus grande légèreté pour des performances extraordinaires.

Ideal for frequent users with a need for reliability, strength and durability.

The most eclectic of all poles is accessible to everyone!

Uso frequente e bisogno di affidabilità, resistenza e durata nel tempo. Il più eclettico dei bastoncini è accessibile a tutti.

Ideal für den häufigen Gebrauch und Erfordernis an Verlässlichkeit, Stärke und Haltbarkeit. Der Vielseitigste aller Stöcke, der für Jeden erschwinglich ist.

Utilisation fréquente et besoin de fiabilité, résistance et durée dans le temps. Le plus éclectique des bâtons est accessible à tous.

When walking requires maximum safety. The indispensable poles to enjoy outdoor life.

Quando camminare richiede la massima sicurezza.

I bastoncini indispensabili per godersi la vita all'aria aperta.

Wenn beim Walken maximale Sicherheit benötigt wird. Der unverzichtbare Stock um das Leben in der Natur zu genießen.

Quand marcher demande la plus grande sécurité.

Les bâtons indispensables pour profiter de la vie en plein air.

trekking max loads

The diagrams show the safest maximum axial load (in kilograms and pounds) for the models indicated as a function of extension (in centimeters and inches) and under conditions of correct use (as explained in the Instructions section).

• Under favorable conditions, for a fraction of a second and up to 150 kg (331 lb), the momentary load can exceed the value given by the curves for a given length by up to approximately 20%.

• Although there are cases where the load can exceed 150kg (331 lb), such value should be considered as the practical load limit for safety reasons regarding grips and plastic tips, especially the longer types.

I diagrammi qui a fianco rappresentano il carico assiale massimo (continuo) di sicurezza (in chilogrammi e libbre), per i vari articoli indicati, in funzione dell'estensione (in centimetri e pollici) e sotto le ipotesi d'uso corretto come indicato nel manuale.

• In condizioni favorevoli, per una frazione di secondo e fino a 150 kg (331 lb), il carico momentaneo può superare di circa il 20% il valore dato dalle curve in corrispondenza ad una data lunghezza.

• Sebbene risultino casi con carico superiore a 150 kg (331 lb), tale valore va preso come limite pratico nell'uso normale, per questioni di margine di sicurezza su manopole e puntali in plastica, specie quelli lunghi.

Die Diagramme zeigen die maximale axiale Belastung (in Kilogramm und Pfund) für die einzelnen Modelle. Abhängig von der jeweiligen Länge (in Zentimeter und Inch). Voraussetzung ist, daß die Stöcke laut Gebrauchsanweisung benutzt werden.

• Unter günstigen Bedingungen kann für einen kurzen Moment und bis zu einem Belastungswert von 150 kg

(331 lb) dieser Wert um ca. 20% überschritten werden.

• Die Belastungsgrenze von 150 kg (331 lb) soll wegen der Haltbarkeit der Griffe und Spitzen aus Sicherheitsgründen nicht überschritten werden.
