AREA TECNICA / TECHNICAL AREA

FAST LOCK

Sistema di bloccaggio esterno ideale anche a basse temperature.

Fast and safe external locking system, ideal for low temperatures.

SOFT

Impugnatura traspirante e leggera.

Soft and light grip.

ALOCS

Ossidazione superficiale protettiva dell'alluminio.

Aluminum oxide coating surface protection.

ULTRA LIGHT

Rapporto peso lunghezza speciale

Ultralight poles with superior length/weight ratio.

A.I.

Anti Impact

Assorbe le vibrazioni dannose.

Absorbs harmful vibrations.

T.P.L.

Top Performance Locking

Sistema di bloccaggio interno con due punti di attrito.

Internal locking system with two points of friction.

U-LOCK

Ultra Lock

Sistema di bloccaggio ad alte performance con leva in alluminio.

High performance locking system with aluminum lever.

S-CARBON

Snake Carbon

Carbonio ad alto modulo a geometria speciale.

Special high module carbon fiber with special geometry.

CARBON

Tubi leggeri e resistenti in carbonio alto modulo.

Light and resistant carbon shafts.

KEVLAR

Carbonio alto modulo rinforzato con Kevlar.

High module carbon reinforced with KEVLAR fibers.

FTS

FTS Aluminum Technology

Costruzione e trattamento superficiale per la massima resistenza agli impatti e la miglior efficienza aerodinamica.

Geometries and surface treatments for high impact resistance and aerodynamic efficiency.

CARBIDE

Puntale in tungsteno.

Carbide tip.

XC GRIP

Impugnatura ergonomica per sci di fondo e alpine touring.

Ergonomic grip for cross country and alpine touring.

DUAL SPIKE

Doppia punta in carbide progettata per lo sci alpinismo.

Double carbide tip designed for ski touring.

CARBIDE XC

Punta in carbide per la massima presa nello sci nordico.

Cross Country Carbide tip.

* Brevettato. Patented.

CLICK ALPINE SKIING

ENG

CLICK Gabel system uses a lever that releases the strap easily by pressure on a button. Simple, reliable, safe, it holds up to 35 kg.

Beyond this limit, the system releases the straps automatically.

FRA

Le système CLICK Gabel utilise un levier qui libère la courroie par simple pression sur un bouton. Simple, fiable, sûr, sa capacité de traction maximale est de 35 kg. Au-delà de cette limite, le système libère la main automatiquement.

ITA

Il sistema CLICK Gabel utilizza una leva che sgancia agevolmente il passamano mediante la semplice pressione esercitata su un pulsante.

Semplice, affidabile, sicuro, la sua capacità massima di trazione è di 35 kg. Oltre questo limite il sistema si sgancia in caso di caduta o bloccaggio del bastoncino.

DE

Das CLICK-System beruht auf einem Hebel, der die Schlaufe löst, sobald der Knopf am oberen Teil des Griffes heruntergedrückt wird.

Funktionelle Vorteile:

- Einfachheit: lässt sich leicht auf- und zuklicken
- Zuverlässigkeit: funktioniert mit einer Fingerbewegung
- Sicherheit: die maximale Zugkraftkapazität des Systems beträgt 35 Kilo. Das heißt, dass die Hand im Fall eines Sturzes oder einer Skistockverklebung befreit wird.

BIOMATRIX

ALPINE SKIING

BIOMATRIX

ENG

Ergonomic and lightweight for a new concept of comfort in skiing: BIOMATRIX, a grip with quick release system, unique in the market without any metal, weighing 30% less than the grips in the market. Ergonomic design.

FRA

Ergonomie et légèreté pour un nouveau concept de confort en ski: BioMatrix, une nouvelle poignée à dégage-ment rapide, tout à fait unique, sans aucun métal, 30% plus légère que les poignées réalisées jusqu'à présent.

ITA

Ergonomia e leggerezza per un nuovo concetto di comfort nello sci: BIOMATRIX, un'impugnatura dotata di sgan-

cio rapido del passamano, unico nel mercato senza alcuna parte metallica, di peso oltre il 30% inferiore rispetto alle impugnature finora realizzate. Design ergonomico.

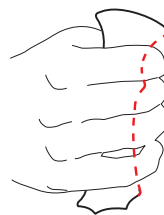

DE

Ergonomie und Leichtigkeit zeichnen diesen Griff aus, der mit dem GABEL CLICK-System ausgestattet ist und ohne Metallteile hergestellt wird. Zudem wurde das Gewicht um über 30% reduziert.

TIGER

ERGONOMIC GRIP

Comfortable grip
Poignée confortable
Impugnatura confortevole
Komfortabler Griff

ENG

Tiger, the new Gabel grip for the Racing and Hi-Performance communities; studied and developed in all the aspects. Made of bi-material (hard-soft), reaches an ideal system grip/ski pole to grant the best grip for a perfect control with an incomparable comfort.

FRA

Tiger, la nouvelle poignée par Gabel, spécialement conçue pour les compétiteurs et les adeptes de grandes performances. Étudiée et développée dans les moindres détails.

Fabrication bi- matière (rigide et souple) pour un système idéal de poignée de bâton de ski permettant d'atteindre la meilleure adhérence, un contrôle parfait et un confort incomparable. Essayez une paire, et amusez-vous!

ITA

Tiger: la nuova impugnatura di Gabel per la competizione, studiata nell'ergonomia fino ai minimi particolari. Costruita in bimatereale, conferisce rigidità al sistema impugnatura/bastoncino per garantire una presa ottimale, ma soprattutto un controllo perfetto con un comfort inimitabile.

DE

Tiger heißt die neue Griffform von Gabel für den Rennlauf und für alle anspruchsvollen Skifahrer. Alle Eigenschaften sind bis ins kleinste Detail entwickelt worden. Die 2-Komponenten Konstruktion (hart/weich) kombiniert perfektes Gleichgewicht und Kontrolle (System Griff/Stock/steif) mit einen superweichen, komfortablen Griff.

GATE POWER

GATE POWER
210g

ENG

The Gate Power technology, developed with our trainers, is a great help for lighter and less powerful athletes. In slalom, in fact, the mass of the athlete may not be enough to guarantee a complete knock down of the gates. This solution, therefore, with the addition of a 210-grams weight in the inner part of the grip, increases the ability to push the gates down without compromising the balance of the pole and without causing excessive stress to the joints of the upper limbs. This results in more aggressive lines and better performance even for the less powerful athletes.

FRA

La technologie Gate Power, développée avec nos entraîneurs, est une aide précieuse pour les athlètes plus légers et moins puissants. En slalom, en effet, la masse de l'athlète peut ne pas être suffisante pour assurer un abattement complet des piquets. Cette solution, par conséquent, avec l'ajout d'un

poids de 210 grammes dans la partie interne de la poignée, augmente la capacité de pousser les piquets sans compromettre l'équilibre du bâton et sans causer une contrainte excessive aux articulations des membres supérieurs. Il en résulte des courbes plus agressives et de meilleures performances, même pour les athlètes moins puissants.

ITA

La tecnologia Gate Power, sviluppata con i nostri allenatori, rappresenta un grande aiuto per gli atleti e le atlete più leggeri e meno potenti. Nello slalom, infatti, la massa dell'atleta può non essere sufficiente a garantire un completo abbattimento delle porte. Questa soluzione, appesantendo di 210 grammi la parte interna all'impugnatura, aumenta la capacità di abbattimento delle porte senza pregiudicare il bilanciamento del bastoncino e senza causare stress eccessivi alle articolazioni degli arti superiori. Il risultato sono traiettorie più aggressive

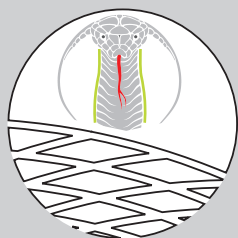

e migliori performance anche per gli atleti meno potenti.

DE

Die Gate Power Technologie, die zusammen mit unseren Fahrern und Trainern entwickelt wurde, ist eine große Hilfe für leichtere und weniger kraftstrotzende Athleten. Beim Slalom kann die Masse des Läufers eventuell nicht ausreichen, um ein vollständiges Wegschlagen der Tore zu garantieren. Die Lösung: Ein zusätzliches Gewicht von 210 Gramm im inneren Teil des Griffs erhöht die Fähigkeit die Tore wegzudrücken, ohne das Gleichgewicht des Stockes zu beeinträchtigen und somit ohne übermäßige Gelenkbelastung der oberen Gliedmaßen.

Das Ergebnis sind aggressivere und direktere Linien durch den Slalomkurs und somit eine bessere Leistung, auch für weniger muskelbepackte Athleten.

SNAKE CARBON

ENG

The recent "Snake Carbon" technology applied to the latest models developed by Gabel combines the excellent resistance of high modulus carbon fibre with a distinctive geometric structure, adding an innovative type of crystallisation technology. This process allowed to make the tubes 20% lighter, as well as boosting resistance by 18%. The combination of HD technologies with these new processes and materials has thus allowed us to introduce an outstanding new product onto the market.

FRA

La récente technologie "Snake Carbon" appliquée aux derniers modèles conçus par Gabel unit la grande résistance du tissu en carbone haut module à une structure géométrique spéciale, ajoutée à une innovante technologie de cristallisation. Ce

processus a permis la réduction du poids des tubes d'environ 20% en augmentant leur résistance de 18%. Et donc, l'union des technologies HD à ces nouveaux processus et matériaux nous a permis d'introduire sur le marché, une nouveauté de très haut.

ITA

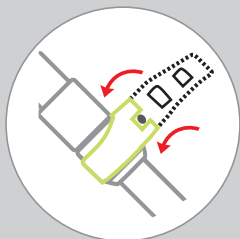

La recente tecnologia "Snake Carbon" applicata agli ultimi modelli sviluppati da Gabel, unisce l'elevata resistenza del tessuto in carbonio ad alto modulo ad una particolare struttura geometrica, abbinata ad una innovativa tecnologia di cristallizzazione. Tale processo ha permesso la riduzione di peso dei tubi di circa il 20%, aumentando la resistenza del 18%. L'abbinamento, quindi, delle tecnologie HD con questi nuovi processi e materiali, ci ha consentito di introdurre nel mercato una novità di altissimo livello.

DE

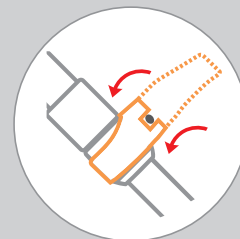

Unsere neuentwickelte "Snake Carbon" Technologie verbindet die extrem hohe Widerstandsfähigkeit des Carbon-Gewebes mit hohem Modul mit einer ganz besonderen geometrischen Struktur, kombiniert mit einer innovativen Kristallisierungstechnologie. Dieses Verfahren ermöglicht die Verminderung des Gewichts der Rohre um mehr als 20%, bei gleichzeitiger Verbesserung der Widerstandsfähigkeit um 18%. Die Kombination von HD-Technologien mit neuen Produktionsverfahren und Materialien hat es uns somit ermöglicht eine Neuheit auf höchstem technischem Niveau auf den Markt zu bringen.

U-LOCK

SPRING FAST LOCK S.F.L.

ENG

The FAST LOCK system is based on the locking clamp principle, as a valid alternative to conventional systems. FAST LOCK does not require rotation of the tubes, but locks them through an external lever mechanism, and is fast and effective, even at low temperatures and when wearing gloves. Now even stronger with the aluminium lever: U-lock.

FRA

Le système innovateur FAST LOCK, une technologie de verrouillage extrême basée sur un mécanisme excentrique, offrant une alternative

au système de verrouillage standard demandant une rotation des tubes. Ce système verrouille les tubes en utilisant un levier externe, rapide et fiable, même dans des conditions extrêmes de basse température ou en portant des gants.

ITA

Il sistema FAST LOCK si basa sul principio della chiusura a morsetto, diventando una valida alternativa ai sistemi tradizionali. FAST LOCK non obbliga alla rotazione dei tubi ma li blocca attraverso un meccanismo a leva esterno, efficace e rapido anche a basse temperature e con l'uso dei guanti.

DE

Das FAST LOCK System basiert auf dem Prinzip des Klemmbügels, als effektive Alternative zu den konventionellen Systemen. Mit dem FAST LOCK System muss man die Rohre nicht mehr drehen, denn diese werden durch einen außenliegenden Flachspannhebelmechanismus blockiert. Das Ergebnis ist eine schnelle, sichere und genaue Verstellung der Stocklänge auch bei sehr kalten Temperaturen und beim Tragen von Handschuhen.

ENG

An innovation in alpine ski poles, developed in cooperation with the athletes of the top national teams. The new dual spike ensures high performance and control both uphill and downhill, especially on tricky slopes and icy snow or rocks.

FRA

Une innovation dans le domaine du bâton de ski de randonnée, développé en coopération avec les athlètes des meilleures équipes nationales. Le nouveau DUAL SPIKE, avec poignée super confortable, s'avère efficace et sûr, tant en montée qu'en descente, en particulier sur les surfaces rocailleuses ou glacées.

ITA

Un'innovazione nel bastoncino da sci alpinismo, sviluppata in collaborazione con gli atleti delle migliori squadre Nazionali. La nuova doppia punta è di grande utilità e sicurezza sia in ascesa che in discesa, specie nei pendii critici e sulle nevi ghiacciate o rocce.

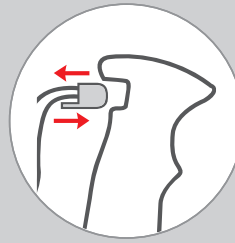

DE

Eine Innovation auf dem Gebiet der Skitourenstöcke, entwickelt in Zusammenarbeit mit unseren Athleten. Der neue DUAL SPIKE ist sowohl beim Aufstieg als auch bei der Abfahrt effizient und sicher, besonders unter kritischen Bedingungen mit vereistem Schnee und Felsen.

MULTI LOCKING SYSTEM

ENG

In order to maximize the locking power of the models featuring the FAST LOCK, Gabel introduces the MULTI LOCKING concept that couples the locking force of the lever with the reliability of the traditional locking system with expander. The addition of an extra locking mechanism, the LITE LOCKING SYSTEM, guarantees total hold of the pole in every temperature and terrain condition.

FRA

Afin de maximiser la capacité de verrouillage des modèles équipés du système FAST LOCK, Gabel introduit le concept MULTI LOCKING qui allie la force de verrouillage du levier à la

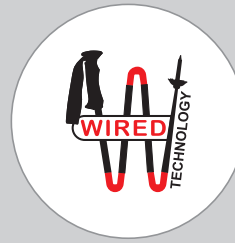

fiabilité du système de verrouillage traditionnel avec extenseur. L'ajout d'un système de verrouillage supplémentaire, le système LITE LOCKING, assure une performance maximale du bâton quelles que soient les conditions climatiques ou de terrain.

ITA

Per ottimizzare il bloccaggio dei prodotti con FAST LOCK, MULTI LOCKING unisce la tenuta del morsetto all'affidabilità del tradizionale sistema ad espansore. Un secondo sistema di bloccaggio interno, il LITE LOCKING SYSTEM, assicura inoltre la totale chiusura in ogni condizione di temperatura e terreno.

DE Um die Blockierung der Produkte mit FAST LOCK noch mehr zu verbessern, stellt Gabel unser MULTI LOCKING vor. Dabei wird der Halt der Klemme mit der Zuverlässigkeit des traditionellen Systems mit Expander verbunden. Das Hinzufügen eines zweiten internen Blockiersystems, das LITE LOCKING SYSTEM, garantiert den vollkommenen und kompakten Verschluss bei allen Temperatur- und Terrains.

WIRED TECHNOLOGY

ENG The innovative technology WIRED will allow you to collapse your pole, using a simple button. The different pole's sections are connected with a high-strength cable. The advantage of this technology is having a pole very compact, light, less bulky and easy to carry.

FRA La technologie innovante WIRED vous permettra de plier votre bâton, en utilisant simplement un bouton. Les différentes sections du bâton sont

reliées entre elles par un câble. L'avantage de cette technologie est d'avoir un bâton compact, léger et facilement transportable.

ITA L'innovativa tecnologia WIRED vi permetterà di piegare il vostro bastoncino dopo l'uso per avere il minor ingombro possibile, utilizzando un semplice pulsante. Le diverse sezioni del bastoncino sono unite tra loro con un cavo in acciaio rivestito in plastica. Il vantaggio di questa tecnologia è

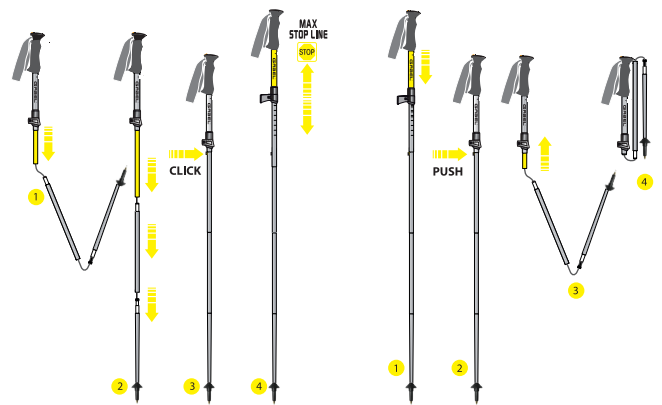

avere un bastoncino compatto, leggero, poco ingombrante e facilmente trasportabile.

DE Die innovative WIRED-Technologie ermöglicht es, den Stock auf ein sehr kompaktes Packmaß zu falten, einfach und schnell durch den Pinverschluss. Durch das Zeltstangenprinzip ist der Stock im Handumdrehen wieder einsatzbereit. Der Vorteil liegt im Rucksacktauglichen Packmaß und in der einfachen Bedienung. Leicht, stabil und solide.

La scelta di Giampaolo Corona

Giampaolo Corona's choice

Giampaolo Corona

Mountain Guide and high altitude climber

"Traveling, meeting people, discovering new places, always pursuing speed and self dependency. To achieve that I need to be light and my gear has to be absolutely reliable."

"Viaggiare, conoscere persone e posti nuovi, alla costante ricerca di essere veloce e autosufficiente. Per fare questo devo essere leggero e il materiale che uso deve essere assolutamente affidabile"

"Voyager, rencontrer des gens, découvrir de nouveaux lieux, toujours à la recherche de vitesse et autonomie. Pour cela, j'ai besoin être léger et mon équipement doit être absolument fiable"

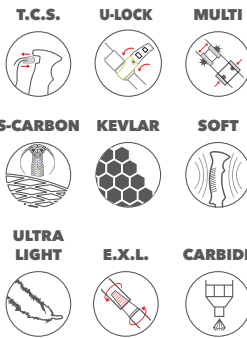

"Reisen, Leute treffen und neue Orte entdecken, immer auf der Suche nach Geschwindigkeit und Selbständigkeit. Dazu muss ich leicht sein und das Material, das ich benutze, muss absolut zuverlässig sein."
