GATE POWER

ENG

The Gate Power technology, developed with our trainers, is a great help for lighter and less powerful athletes. In slalom, in fact, the mass of the athlete may not be enough to guarantee a complete knock down of the gates. This solution, therefore, with the addition of a 210-grams weight in the inner part of the grip, increases the ability to push the gates down without compromising the balance of the pole and without causing excessive stress to the joints of the upper limbs. This results in more aggressive lines and better performance even for the less powerful athletes.

FRA

La technologie Gate Power, développée avec nos entraîneurs, est une aide précieuse pour les athlètes plus légers et moins puissants. En slalom, en effet, la masse de l'athlète peut ne pas être suffisante pour assurer un abattement complet des piquets. Cette solution,

par conséquent, avec l'ajout d'un poids de 210 grammes dans la partie interne de la poignée, augmente la capacité de pousser les piquets sans compromettre l'équilibre du bâton et sans causer une contrainte excessive aux articulations des membres supérieurs. Il en résulte des courbes plus agressives et de meilleures performances, même pour les athlètes moins puissants.

ITA

La tecnologia Gate Power, sviluppata con i nostri allenatori, rappresenta un grande aiuto per gli atleti e le atlete più leggeri e meno potenti. Nello slalom, infatti, la massa dell'atleta può non essere sufficiente a garantire un completo abbattimento delle porte. Questa soluzione, appesantendo di 210 grammi la parte interna all'impugnatura, aumenta la capacità di abbattimento delle porte senza pregiudicare il bilanciamento del bastoncino e senza causare stress eccessivi alle

articolazioni degli arti superiori. Il risultato sono traiettorie più aggressive e migliori performance anche per gli atleti meno potenti.

DE

Die Gate Power Technologie, die zusammen mit unseren Fahrern und Trainern entwickelt wurde, ist eine große Hilfe für leichtere und weniger kraftstrotzende Athleten. Beim Slalom kann die Masse des Läufers eventuell nicht ausreichen, um ein vollständiges Wegschlagen der Tore zu garantieren. Die Lösung: Ein zusätzliches Gewicht von 210 Gramm im inneren Teil des Griffs erhöht die Fähigkeit die Tore wegzudrücken, ohne das Gleichgewicht des Stockes zu beeinträchtigen und somit ohne übermäßige Gelenkbelastung der oberen Gliedmaßen.

Das Ergebnis sind aggressivere und direktere Linien durch den Slalomkurs und somit eine bessere Leistung, auch für weniger muskelbepackte Athleten.

SNAKE CARBON

ENG

The recent "Snake Carbon" technology applied to the latest models developed by Gabel combines the excellent resistance of high modulus carbon fibre with a distinctive geometric structure, adding an innovative type of crystallisation technology. This process allowed to make the tubes 20% lighter, as well as boosting resistance by 18%. The combination of HD technologies with these new processes and materials has thus allowed us to introduce an outstanding new product onto the market.

FRA

La récente technologie "Snake Carbon" appliquée aux derniers modèles conçus par Gabel unit la grande résistance du tissu en carbone haut module à une structure géométrique

spéciale, ajoutée à une innovante technologie de cristallisation. Ce processus a permis la réduction du poids des tubes d'environ 20% en augmentant leur résistance de 18%. Et donc, l'union des technologies HD à ces nouveaux processus et matériaux nous a permis d'introduire sur le marché, une nouveauté de très haut.

ITA

La recente tecnologia "Snake Carbon" applicata agli ultimi modelli sviluppati da Gabel, unisce l'elevata resistenza del tessuto in carbonio ad alto modulo ad una particolare struttura geometrica, abbinata ad una innovativa tecnologia di cristallizzazione. Tale processo ha permesso la riduzione di peso dei tubi di circa il 20%, aumentandone la resistenza del 18%. L'abbinamento, quindi, delle tecnologie HD

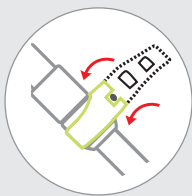

con questi nuovi processi e materiali, ci ha consentito di introdurre nel mercato una novità di altissimo livello.

DE

Unsere neuentwickelte "Snake Carbon" Technologie verbindet die extrem hohe Widerstandsfähigkeit des Carbon-Gewebes mit hohem Modul mit einer ganz besonderen geometrischen Struktur, kombiniert mit einer innovativen Kristallisierungstechnologie. Dieses Verfahren ermöglicht die Verminderung des Gewichts der Rohre um mehr als 20%, bei gleichzeitiger Verbesserung der Widerstandsfähigkeit um 18%. Die Kombination von HD-Technologien mit neuen Produktionsverfahren und Materialien hat es uns somit ermöglicht eine Neuheit auf höchstem technischem Niveau auf den Markt zu bringen.

U-LOCK

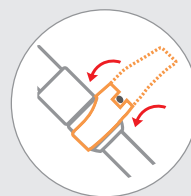

ENG

The FAST LOCK system is based on the locking clamp principle, as a valid alternative to conventional systems. FAST LOCK does not require rotation of the tubes, but locks them through an external lever mechanism, and is fast and effective, even at low temperatures and when wearing gloves. Now even stronger with the aluminium lever: U-lock.

ITA

Il sistema FAST LOCK si basa sul principio della chiusura a morsetto, diventando una valida alternativa ai sistemi tradizionali. FAST LOCK non obbliga alla rotazione dei tubi ma li blocca attraverso un meccanismo a leva esterno, efficace e rapido anche a basse temperature e con l'uso dei guanti.

DE

Das FAST LOCK System basiert auf dem Prinzip des Klemmbügels, als effektive Alternative zu den konventionellen Systemen. Mit dem FAST LOCK System muss man die Rohre nicht mehr drehen, denn diese werden durch einen außenliegenden Flachspannhebelmechanismus blockiert. Das Ergebnis ist eine schnelle, sichere und genaue Verstellung der Stocklänge auch bei sehr kalten Temperaturen und beim Tragen von Handschuhen.

MULTI LOCKING SYSTEM

ENG

In order to maximize the locking power of the models featuring the FAST LOCK, Gabel introduces the MULTI LOCKING concept that couples the locking force of the lever with the reliability of the traditional locking system with expander. The addition of an extra locking mechanism, the LITE LOCKING SYSTEM, guarantees total hold of the pole in every temperature and terrain condition.

FRA

Afin de maximiser la capacité de verrouillage des modèles équipés du système FAST LOCK, Gabel introduit le concept MULTI LOCKING qui allie la force de verrouillage du levier à la fia-

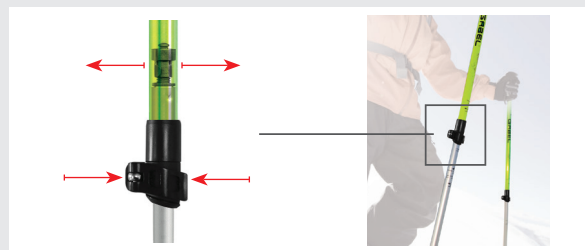

bilité du système de verrouillage traditionnel avec extenseur. L'ajout d'un système de verrouillage supplémentaire, le système LITE LOCKING, assure une performance maximale du bâton quelles que soient les conditions climatiques ou de terrain.

ITA

Per ottimizzare il bloccaggio dei prodotti con FAST LOCK, MULTI LOCKING unisce la tenuta del morsetto all'affidabilità del tradizionale sistema ad espansore. Un secondo sistema di bloccaggio interno, il LITE LOCKING SYSTEM, assicura inoltre la totale chiusura in ogni condizione di temperatura e terreno.

Um die Blockierung der Produkte mit FAST LOCK noch mehr zu verbessern, stellt Gabel unser MULTI LOCKING vor. Dabei wird der Halt der Klemme mit der Zuverlässigkeit des traditionellen Systems mit Expander verbunden. Das Hinzufügen eines zweiten internen Blockiersystems, das LITE LOCKING SYSTEM, garantiert den vollkommenen und kompakten Verschluss bei allen Temperatur- und Terrains.
