# TAKE ON ANY ADVENTURE

From the cities to the forests and the mountains to the oceans, you will find us. Shedding water off the jacket of the avid hunter. Patching the holes in the sleeping bag of the thru-hiker. Cleaning the salt from the wetsuit of the ocean surfer.

We know adventure and the gear that is essential for it. Camping. Paddling. Diving. Skiing. Hunting. Fishing. For forty years we've been seeking to solve your problems.

# REPAIR RENEW REUSE

Your gear is more than just the stuff you need on a weekend camping trip or a trek up the mountains—it's the tent that can withstand the downpour you weren't predicting, the down jacket that keeps you warm as you head into work when the temperatures dip, and the wetsuit that protects you when you're diving into new depths of the ocean. As you hike up, climb down, or bike over on your adventures, your gear is bound to get beat up along the way, sending you back to the outdoor store to replace it.

**At GEAR AID, we believe in preserving the longevity of your outdoor gear, outerwear and footwear with our philosophy of Repair, Renew, Reuse. Instead of purchasing new gear every time it rips or tears, repair it by using one of our innovative products to make it last longer. When your gear starts to look faded or cracked, renew it by learning how to care for and improve its performance. And when you're finally ready to upgrade, reuse it by selling, donating, or recycling so that you can reduce waste and help care for this earth we all love to explore.**

**Each scratch or gash on your gear tells a tale of where you've been and what happened along the way—so why not keep the story going for as long as possible?**

## REPAIR.

### **WHEN IT BREAKS, WE FIX IT.**

Part of loving the outdoors is loving its unpredictability—the wildlife that you see on the trails or the huge waves you get when you're out on dawn patrol—but that can lead to your gear getting torn up when you least expect it. The fear of making a problem worse or not knowing how to approach a gear repair can make you hesitant to take one on.

Thanks to our step-by-step instructions on patching, sealing, and sewing—plus our innovative and long-lasting adhesives, patches and zips—you can not only fix up your gear, but you can also empower yourself by learning to fix it yourself. Most importantly, you'll extend its life, save money, and keep it out of the landfill, all while letting each patch or repaired seam tell a personalized story of your experiences outside.

Imagine not having to give up your beloved waders that were with you on your trip to Big Horn River or that trusty duffel that you've taken with you all over the world (or maybe just to the gym and back). With GEAR AID, you don't have to let go of those memories just yet. Learning how to DIY your own gear repairs instead of sending it off to the manufacturer will also save you time—and won't keep you waiting to head out on your next experience.

Want to learn more? Check out our DIY repair blogs or ask our repair experts for advice on the best approaches to gear repair and which products will work best for your equipment. You can also get in-person advice at a local repair shop near you.

## RENEW.

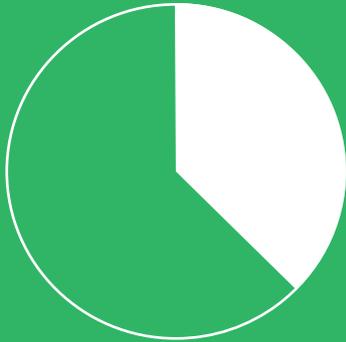

### **PERFORMANCE AT ITS BEST.**

We all have that prized pair of boots that's helped us climb one more peak or that comfortable tent that's kept us warm in the middle of a wind storm, but over the months or years of use they may have noticeably become less breathable, less repellent, or less warm. Renewing your gear with protectants, cleaners, and conditioners can increase performance and give the durability that will carry you through your next set of adventures.

We know that having the latest equipment doesn't compare with the feeling you get when you slip on your wet suit that fits just right or tie up your hiking boots that you've broken in after miles and miles on the trails.

QUICK STATS

ON AVERAGE, OVER  
**40%**

...of a product's environmental impact is attributed to product care and end of life disposal.

SRC: OUTDOOR INDUSTRY ASSOCIATION

IN 2018, WE ESTIMATE  
**OVER 2 MILLION**

pieces of outerwear, footwear and outdoor gear were repaired with GEAR AID products.

We want to help you learn to read the signs that your gear needs some TLC—whether that's visible dirt, fading, wet-out, cracking material, or flattening of the product.

We also want you to know how to care for your equipment properly so that it can last as long as you need it. After usage, it's always best to clean or condition your gear and apply necessary protectants before you use it again—all in the name of extending its life and keeping its performance the same as it was on day one.

### Top DOs & DON'Ts

- » **DO** read all manufacturer care tags
- » **DO** hand wash all tents, boots, and wet suits
- » **DO** spot test leathers and suedes before you use product on them
- » **DO** dry down products with wool dryer balls to maintain shape
- » **DON'T** use regular detergents with technical fabrics
- » **DON'T** use high heat with lightweight fabrics
- » **DON'T** dry your gear in the sun

Before you start your renewal journey, search our DIY care blogs, email us with protectant and gear cleaning questions, or get help from professional services that can determine the right care plan for your gear.

**RENEW.**

### GIVE IT NEW PURPOSE.

You've been through a lot with your gear, but there comes a point where you may be interested in upgrading or you've simply got everything you can out of it. Before you toss it out in the rubbish bin, take a minute to think about how you can give your old outdoor products a new life—whether that's selling, donating, recycling, or upcycling it.

Your gear is a major investment, and caring for it throughout its life can give you the potential to earn some cash when you're finished with it. If you think your gear still has some decent life left and could be valuable to a fellow outdoor enthusiast, resell it and use the money to put toward a new tent, wet suit, or that pair of hiking boots you've had your eye on. Unsure of where to start? Try reselling through Patagonia Worn Wear, TNF Renewed, VAUDE Second Use, Globetrotter Online-Gebrauchmarkt (D/A) or even sites like ubup.com, allegro.pl, Stadium Goods etc.. or donating it to e.g. The Alpkit Continuum Project in UK.

Another way to give new life to your gear is to donate it to an organization that could benefit from its use— like from organizations which inspires kids to get outside, to nonprofits like GRV GreenRoomVoice, GiftYourGear or Soles4Souls, which assists developing nations with shoe donations.

You could also consider recycling or upcycling your gear so that it gets new purpose. Whether you choose to upcycle your old tent into your child's new adventure space in the backyard, turn your old pair of boots into a new planter, or opt to donate your gear to companies who use old equipment to sustainably create new products like Re:Down, Patagonia, Suga Mat, RubyMoon or Good Krama, repurposing your gear helps reduce the amount of energy it takes to produce new products, and also helps preserve our wildlife and natural places.

**Because how else can we celebrate this earth that we all love so much unless we reduce our impact and leave it better than we found so that the next generations of adventurers so that they can enjoy it for centuries to come?**

QUICK STATS

On average, heavy-duty hiking boots can last 30% longer when properly cared for.

Waterproofs synthetic fabrics up to 18 m². Long-lasting polyurethane waterproofer for tents, tarps and stuff sack. Water-based formula that's non-toxic, dries clear and stays flexible.

- 10607 Bottle 250 ml

**GEAR TIP**

Once Seam Grip has cured, dust with baby powder creating a barrier to keep the sealant from sticking to itself.

# TENACIOUS TAPE<sup>®</sup>

---

Tears and rips can happen – especially when you're active. Tenacious Tape, our line of repair tapes and patches, are ready for nearly any kind of slash, cut, crack, or break in your nylon, silnylon, polyester, neoprene, vinyl, rubber, GORE-TEX<sup>®</sup> and SympaTex<sup>®</sup> fabric gear. Choose from peel-and-stick or iron-on options that are both washable and weatherproof for extreme durability. Keep visible and safe with Tenacious Tape Reflective.

# PATCH MISHAPS

"Tenacious Indeed! Withstands wear, washer and dryer. Saved a €200 down jacket."

TENACIOUS TAPE

**NEW**

# WORLD'S FIRST SILNYLON PEEL'N'PATCH

"It's now easier than ever to repair high-tech, lightweight gear with our Silnylon Patches," says Christian Rudolph, GEAR AID product manager. He adds, "There's nothing quite like it on the market today. It's a quick fix to extend the life of silnylon tarps, tents, backpacks and dry sacks."

### Repair Tape

Make nearly invisible repairs to tents, jackets and gear. Washable, peel-and-stick tape adheres to nylon, vinyl and GORE-TEX® fabric. Includes 7.6 x 50 cm roll in various colours.

- 10689 Black Nylon
- 10692 Clear PVC
- 10695 Sage Green Ripstop Nylon
- 10696 Grey Ripstop Nylon
- 10667 Coyote Nylon
- 10668 ODGreen Nylon
- 10686 Yellow Nylon

Tape loosely packed. Tube no longer included.

### Reflective Tape

Add visibility to jackets, clothing, bikes, helmets, pet accessories and more. This washable, high visibility fabric tape sticks to almost any surface and adds reflectivity to jackets, backpacks, clothing, shoes, helmets, pet accessories and more. Includes one 7.6 x 50 cm roll.

- 91123 SILVER 7.6 x 50 cm

Tape loosely packed. Tube no longer included.

**GORE-TEX® Fabric Patches**

Use these pressure-sensitive repair patches for rips, tears or holes on GORE-TEX fabric including jackets, trousers and gloves. Includes 7.6 cm round patch and 10 x 5 cm patch.

15311 BLACK

**SympaTex® Fabric Patches**

Use these pressure-sensitive repair patches for rips, tears or holes on SympaTex fabric including jackets, trousers and gloves. Includes 7.6 cm round patch and 10 x 5 cm patch.

91125 BLACK

**Silnylon Patches**

Fix ripped Silnylon tents and tarps fast with these peel-and-stick patches designed to adhere to silicone coated nylon fabrics. Includes two 7.6 x 12.7 cm ripstop patches.

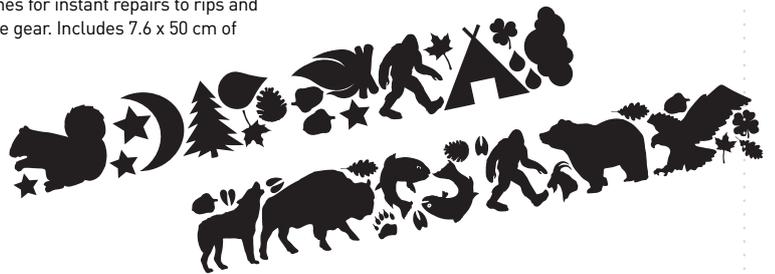

10670 semi-transparent RIPSTOP

**Gear Patches**

Peel-and-stick these fabric patches for instant repairs to rips and holes, hide stains and personalize gear. Includes 7.6 x 50 cm of nylon tape with pre-cut shapes.

91121 CAMPING  
91122 WILDLIFE

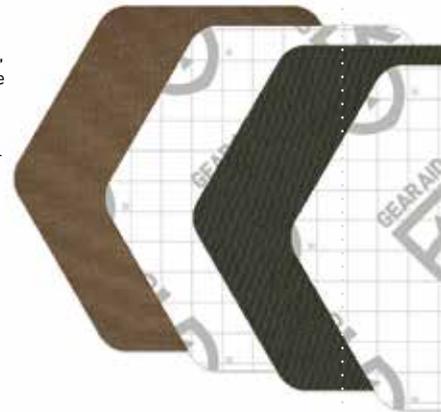

**NEW**

**Repair Hex Patches**

Reach for Tenacious Tape whenever a tear or rip happens. Quickly fix tents, ski pants, or puffy coats with this strong, weatherproof tape that comes in GEAR AID's signature hex shape. The unique design allows for technical repairs, able to be placed along seams and zippers without hand trimming. Backed by an ultra-aggressive adhesive, it won't peel off when applied to technical fabrics including nylon and vinyl. The small hex is perfect for baffles on down sweaters, sleeping bags, and backpacks while the large hex fixes bigger repairs on tents, sleeping pads, and waders. Neutral colors blend in on traditional outdoor and hunting fabrics; solid black is perfect for dark fabrics; clear works for nearly transparent repairs on any color fabric.

10733 Coyote  
10692 OD Green  
10730 Black  
10731 Clear (PVC)

**Repair Patches**

Fix jackets, tents and sleeping bags easily by patching up rips, holes and gashes. Includes two 7.6 cm black fabric and two 7.6 cm clear round patches.

10676 Clamshell 7.6 cm Ø

**Flex Patches**

Make heavy-duty repairs on vinyl, inflatables and plastic. Includes two 7.6 x 12.5 cm TPU patches that stretch and resist punctures.

10800 CLEAR 7.6 x 12.5 cm

**NEW**

**Peel & Stick Neoprene**

Pressure sensitive neoprene patches for quick infield repair of tears and holes on wet & dry suits or any other neoprene equipment.

Includes

- 2 x Ø 51 mm Neoprene Pre-cut Circle

**Rug Fix Kit**

Ideal for repairing all types of horse blankets. Fix tears and holes, broken seams, loose adging and torn straps in seconds for flexible, long-lasting repairs. Includes one nylon iron-on patch (15 x 25 cm), one nylon fabric strip (7.5 x 50 cm), one 7 g tube of Aquasure FD + heat shielding paper.

91124 BLACK

# REVIVEX<sup>®</sup>

---

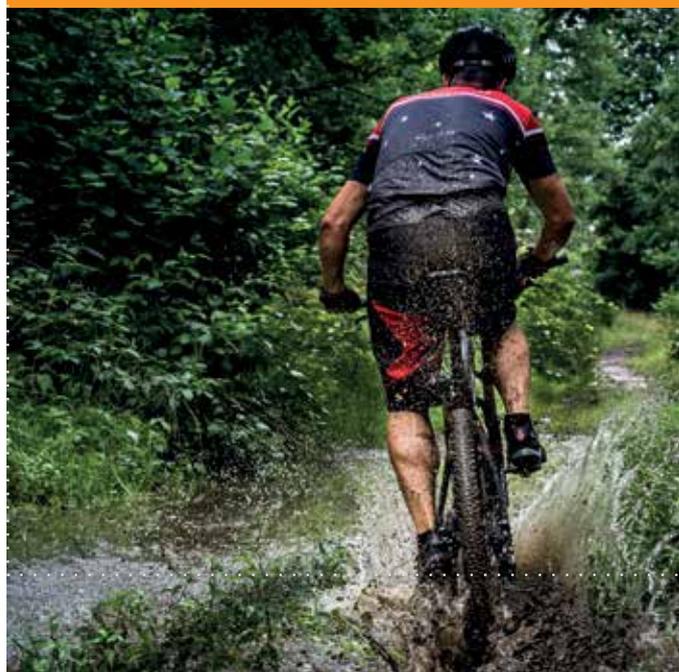

**Keep your gear performing just as well as it did on day one. Our line of Revivex cleaners, conditioners, and protectants can restore your gear, make it last longer, and help you be more comfortable in whatever kind of outdoor activity you do—from hiking, fishing, kayaking, or even just walking from your car to your office.**

# PROTECT GEAR

"Wow is all I can say, no need for a poncho with this waterproofing"

## Pro Cleaner

Cleans technical garments, sleeping bags and tents. Restores breathability without impacting DWR on GORE-TEX® fabrics. A 250 ml bottle washes approx 16 jackets.

36295    Bottle    250 ml

+

**NEW**

**NEW  
PFAS-FREE  
FORMULA**

## Durable Water Repellent

Restore DWR to outerwear, tents and GORE-TEX® garments. High-performance formula is PFOA and PFOS-free and repels water, oil, stains and dirt.

36226    Pump Spray    500 ml

## Tent Water Repellent

High performance tent waterproofer helps restore water repellency to outdoor gear leaving a dry, non-stick finish. Hundreds of uses: Tents, rucksacks, sleeping bags, caravan awnings, camping gear, waders. Also useful as a light lubricant + protector for inflatable boats, oar locks, fishing boots + reels, bag zips, ski bindings + boots, hinges etc.

91240    Spray    500 ml

## UV Protectant

Protect tents, kayaks and outdoor gear from UV damage. Prevents cracking and fading, and restores colour and shine. Use on plastic, nylon, neoprene and more.

22795    Pump Spray    120 ml  
22798    Bottle    355 ml

**NEW  
PFAS-FREE  
FORMULA**

**Leather Water Repellent**

Protect and condition full-grain leather boots, shoes and gloves. Gel formula soaks into leather for an all-season solution to drying, cracking and rain.

36260    Bottle    120 ml

**Suede + Fabric Water Repellent**

Protect suede, nubuck, and fabric footwear from water, dirt and stains. Gentle formula maximizes breathability and is safe for GORE-TEX® fabric.

36270    Pump Spray    120 ml

**Rubber Boot Treatment + Rubber Boot Eco Care\***

Condition and protect rubber and neoprene boots from drying, cracking and UV exposure. Also prevents blooming and restores shine.

\* Ecofriendly water-based Formula  
Contains no chemicals

22600    RB Treatment    120 ml  
91241    RB Eco Care    120 ml

**Leather Wax**

Leather proofing + conditioner for all full-grain leather equipment, footwear + saddles etc. Contains 100% natural ingredients: vegetable oil, tallow, beeswax, carnauba wax and lanolin.

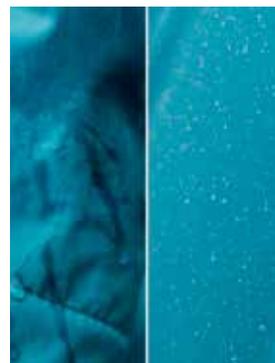

Suitable for footwear with breathable membranes such as GORE-TEX® and GORE-TEX® XCR® footwear.

36200    Container    100 ml

**GEAR TIP**

Regularly washing your technical outdoor gear with a specialized cleaner will remove dirt and grime, and help revive the Durable Water Repellency of your gear. Applying heat to the garment will also help those little hairs to stand back up.

REVIVEX

# REVITALIZE GEAR

"This detergent really blew me away...our old jackets are good as new!"

## B.C.D. Cleaner + Conditioner

Removes bacteria, salt and chlorine crystals from buoyancy compensator devices (B.C.D.). Safe to use on all dive equipment and scuba gear. A 250 ml bottle is enough for approx 8 washes.

34120 Bottle 250 ml

## Pro Cleaner

Cleans technical garments, sleeping bags and tents. Restores breathability without impacting DWR on GORE-TEX® fabrics. A 250 ml bottle washes approx 16 jackets.

36295 Bottle 250 ml

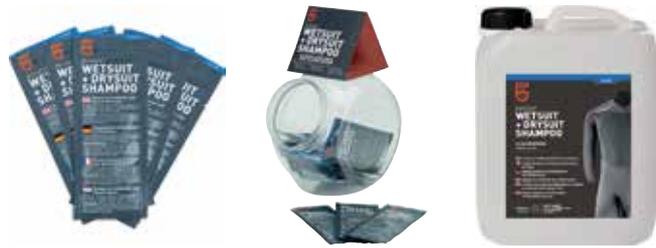

**Wetsuit + Drysuit Shampoo**

Cleans and conditions wet suits, dry suits, booties and gloves. Prevents premature aging and oxidation of neoprene gear. A 250 ml bottle is enough for approx 16 washes.

30122	Bottle	250 ml
30821	Fish Bowl	60 x 15 ml
30822	Refill Pack	60 x 15ml
30814	Travel Packs	750 x 15 ml
30130	Container	5 L

**Odor Eliminator**

Deodorizes wet suits, tents, garments, footwear and sports equipment. Water-activated microbes remove odour caused by mould, mildew, sweat, and bacteria. A 250 ml bottle is enough for approx 16 washes of clothes.

36134	Bottle	250 ml
36121	Fish Bowl	60 x 15 ml
36122	Refill Pack	60 x 15 ml
36112	Travel Packs	750 x 15 ml
36119	Container	5 L

**GEAR TIP**

It is important that you use a specialized cleaner for technical fabrics. Mass-market detergents contain additives such as foaming agents, optical brighteners, dyes, enzymes and fragrances etc. They can leave residues on fibers that can potentially impact fabric performance, particularly water repellency.

The advantage of specialized cleaning products: They are engineered to rinse away thoroughly without depositing residues.

(American pouch packaging - not available in Europe yet.)

# MAINTENANCE+ PERFORMANCE

---

**Taking good care of our action gear keeps it out of the trash and performing like new. Gear is awesome and sacred. Divers need fog-free vision. Triathletes need speedy transitions. Everyone needs zips that run smoothly.**

# PROTECTS LUBRICATES + CONDITIONS

"Keeps zips going for years. I recommend the GA Zipper Cleaner+Lubricant to anyone that wants to keep their gear in tip top shape."

## Zipper Lubricants

### Zipper Cleaner + Lubricant

Prolongs the life of plastic, nylon and metal zips on tents, wet suits, duffels and sleeping bags. Brush-top removes harmful dirt and applies lubricant.

29118 Bottle with brush applicator 60 ml

### Zipper Lubricant Stick

Lubricate and protect plastic, metal, or watertight zips on wet suits, dry suits, tents, soft coolers and more. Includes two 4.5 g sticks per package.

91120 Clamshell 2 x 4.5 g  
91119 Bulk Stick 1 x 4.5 g

### Zipper Wax

Protects watertight zips against rust, corrosion, chlorine and salt in all temperatures. Soft wax formula contains no silicone and extends the life of zips.

28116 Clamshell 20 g

## Lubricants

### Silicone Grease

Lubricates and conditions rubber, metal and plastic SCUBA equipment parts like O-rings and regulator parts. Made of 100% pure, food-grade silicone grease.

26118 Clamshell 7 g

### Seal Saver

Protects and conditions dry suit seals, gaskets, O-rings and rubber products. Preserves and maintains latex and neoprene seals while inhibiting oxidation and deterioration.

24118 Clamshell 37 ml

NEW SIZE

### Silicone Lubricant

Spray on to lubricate, condition and protect neoprene from salt, oxidation and corrosion. Allows for ease of suit entry.

91243 Spray 500 ml  
replaces 20115 (150 ml)

### Silicone Protectant

Lubricates and conditions all rubber products. Prevents oxidation and corrosion from saltwater exposure.

22112 Pump Spray 250 ml

## Aid

### Neo Slix™

Helps ensure a fast and stress free entry or exit from neoprene wet or dry suits etc. For use by scuba divers, surfers and triathletes where Neo Slix has been proven to reduce transition time by up to 60 %. Helps prevent uncomfortable skin rashes caused by wet suit abrasion areas.

Hypoallergenic, fragrance-free and environmentally safe.

20000 Pump Spray 250 ml

### Talcum Powder

Helps preserve latex and rubber seals. Eases entry into water sports suits and helps prevent chafing. Also used for dusting Aquasare repairs etc.

37131 Shaker Bottle 100 g

NEW SIZE

# GET CLEAN AND CLEAR VISION

Avid scuba divers, instructors and professional gear testers alike agree: Sea Gold is their anti-fog treatment of choice.

## Anti-Fogs

### Sea Drops™ Anti-Fog + Lens Cleaner

Keeps masks clean and fog-free with a concentrated 2-in-1 formula. Non-toxic and safe for all glass and plastic dive and snorkel mask lenses. Not for swim goggles.

40230	Bottle in clamshell	37 ml
40114	Bottle bulk	37 ml
40418	Bottle with brush in clamshell	60 ml
41206	Bottle with brush bulk	60 ml

### Anti-Fog Spray

Enjoy fog-free vision when using goggles, masks, face shields and all types of eyewear. Fast-acting, non-toxic and alcohol-free.

40101	Bottle in clamshell	60 ml
40100	Bottle bulk	60 ml

### Sea Buff™ Pre-Cleaner

Use Sea Buff as a pre-cleaner prior to anti-fog treatment. Removes manufacturing residue, dirt, sunscreen, algae and other debris on dive mask lenses.

Use on tempered glass lenses only.

40832	Bottle in clamshell	37 ml
40835	Bottle bulk	37 ml

**Sea Gold™ Anti-Fog Gel**

Get crystal clear vision for hours with this powerful, highly concentrated formula that lasts longer than other anti-fog treatments. Non-toxic and safe for all glass and plastic dive and snorkel masks and lenses. Not for use on swim goggles.

- 40854 Bottle in clamshell 37 ml
- 40852 Bottle bulk 37 ml

**Goggle Bright™ Anti-Fog Cleaner**

This powerful, alcohol-free formula has been designed to prevent fogging on all types of lenses and optics including eye glasses, sunglasses, swim goggles, ski goggles, helmet visors, binoculars and more.

- 40791 Pump Spray 60 ml

**Op Drops™ Anti-Fog + Lens Cleaner**

This gentle 2-in-1 complete anti-fog and lens cleaning system works on dry lenses and optics keeping them fog-free for hours. This alcohol-free formula is safe for use on safety glasses, eye glasses, binoculars, scopes, helmet visors and more. Includes microfiber cleaning cloth/storage bag.

- 44053 7,4 ml

**GEAR TIP**

When scuba diving or snorkelling, there's nothing more annoying than a fogged-up dive mask. Defog with Sea Gold Anti-Fog Gel, a powerful formula that lasts longer than other anti-fog treatments. It's highly concentrated, so underwater enthusiasts can enjoy multiple dives with just one treatment. Use in any water temperature and in all conditions. Avid scuba divers, instructors and professional gear testers alike agree: Sea Gold is their choice of anti-fog treatment.

# HEROCLIP

---

**Clip, hang, and carry gear with our versatile swiveling carabiner. Free your hands on any adventure whether in the garage, camping, in the car, or on the go with a 360 degree rotation, rubber footed hook, and sturdy frame. Available in large, medium, small, and mini, fit your Heroclip to your gear needs.**

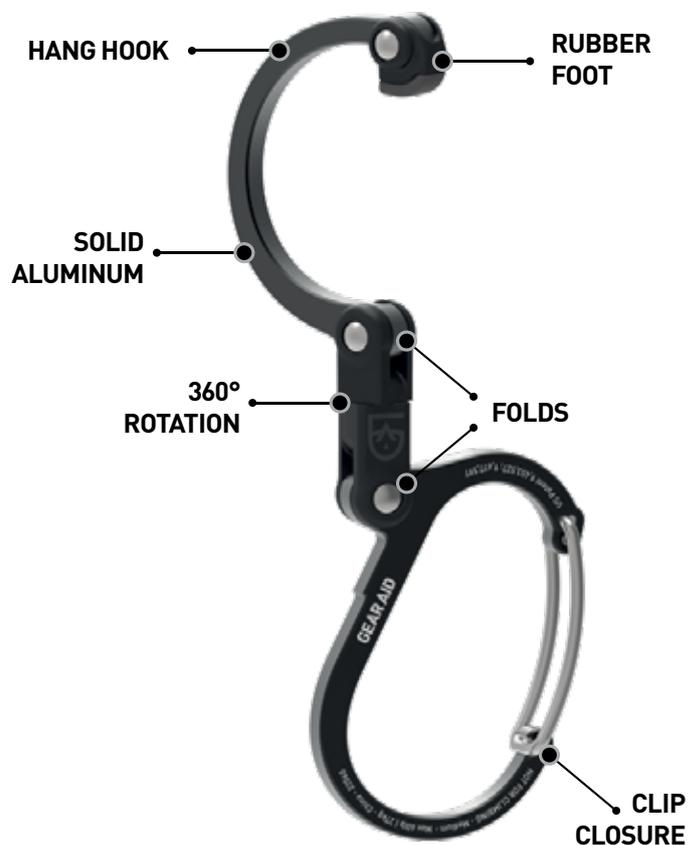

# HANG LIKE A PRO

"HEROCLIP helps keep your gear organized and exactly where you want it."

**NEW**

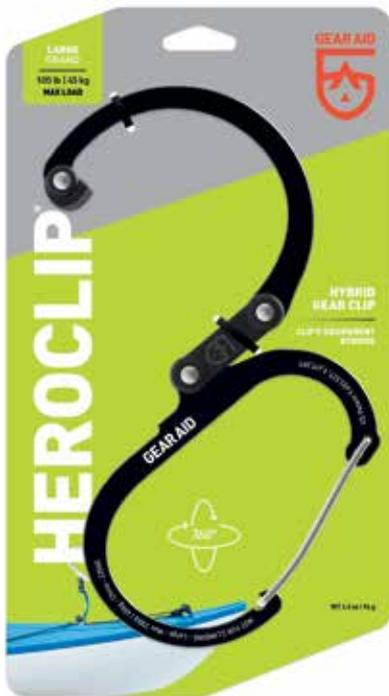

## INTRODUCING OUR HYBRID GEAR CLIP

HEROCLIP helps keep your gear organized and exactly where you want it, whether you're backpacking, boating, hunting, traveling, car camping, or hanging gear on the go. The hook rotates 360° and folds compactly in ways other carabiners, clips and hooks can't. Available in a range of four sizes, the HEROCLIP line is designed to hang different kinds of gear, ranging from backpacks, water bottles, lanterns, duffles, hydration packs, lanterns and bikes. The hook features a grippy rubber foot so it can hang from most flat surfaces without slipping. The solid aluminum design includes composite, steel, and anodized finish, making it durable and rugged no matter where you decide to adventure\*.

**PLEASE NOTE:**  
HEROCLIPS are not designed for climbing.

# ADVENTURE TOOLS

---

**Just because you're outside doesn't mean you have to rough it. Get the gear to help you love the outdoors even more with our Adventure Tools – designed to make camping, diving, hiking, biking, and just being outside better. A lot better.**

# GEAR UP AND GO

"Paracord can be used anywhere you need a strong line.  
It can really stand up to weight and pressure."

**NEW**

### Camp Line Kit

Hang gear, organize camp, and dry towels with ease. This lightweight kit includes 9 m of reflective 550 Paracord, two Camp Carabiners, and two Line Tensioners.

80705

### Gruntline™ Elastic Cord

Use as clothesline, tie down strap, belt, arm sling, or sling shot. Braided utility line stretches to 2 m and holds up to 9 kg.

68215    BLACK

**NEW**

**Camp Carabiner**

Hang water bottles, dry bags, and lanterns with knot-free ease from a 550 paracord. This lightweight carabiner keeps gear anchored in place with our signature twist-and-clip design.

80700

**NEW**

**Taut Line Kit**

Tension a tent, hang a bear bag or make a clothesline with ease. Includes 15 m of heavy-duty, reflective 550 Paracord and four adjustable Line Tensioners.

80715

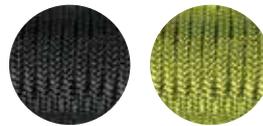

# Care for Adventure.

**Paracord**

Choose from 9 m, 15 m, or 30 m of utility cord that's made from 100% nylon. Use it to secure a shelter, hang a clothesline, or make a survival bracelet.

In addition to concealment, Camo Form improves grip, reduces noise, and protects hands from hot or cold surfaces. Camo Form can be used to camouflage other gear including flashlights, hatchet and knife handles, scopes, and tree stands.

# DSGN FRM WTHN

Our focus to “design from within” is part of our mission to fix gear and bring solutions to the outdoors. We sat down to chat with GEAR AID® design director, Ray Klein, for a behind the scenes look at our product development process and why we value original ideas. With more than 20 years of experience in the outdoor industry, he shares the importance of designing from within and how our new line of Adventure Tools came to life at GEAR AID.

### HOW DID YOU FIRST BECOME INTERESTED IN PRODUCT ENGINEERING AND DESIGN?

Back when I was a kid, I was really interested in taking things apart. I liked sketching and got into art at a young age. Then I slowly got more interested in design as I learned what it was.

### HOW DID YOU KNOW THAT DESIGN WAS WHAT YOU WANTED TO DO FOR A LIVING?

I went through a graphic program first, but that didn't quite do it for me. After finding industrial design at a university close to home, I was hooked right away. The fact that I could combine art and engineering, it was the perfect balance of the two. And it gave me the opportunity to work in the third dimension and not so much in 2D as a graphic designer. That's how I discovered industrial design and once I was hooked, I knew I'd do it for my entire career.

### WHAT ARE THE QUALITIES THAT A PRODUCT DESIGNER SHOULD HAVE?

Curiosity is number one. You should be a curious person and be interested in exploring and sketching. You have to learn how to use your hands. You're basically taking somebody's words and ideas and you're starting to build them into visual representations of those ideas. Then you start to actually build them into objects, so two-dimensional and three-dimensional problem solving is super important. You end up using CAD systems and learning how to do CAD models and build prototypes. Also, having a natural interest in manufacturing and new technologies, because industrial designers drive the product development process in the early stages.

### HOW DO YOU DESIGN A SUCCESSFUL PRODUCT?

It's a process. Design is iterative. Going back to the research, the testing, the prototypes and continuing to sketch and to try and solve the problem. It's rarely ever done the first time. There's a lot of going back and starting over again, so lots of prototyping. I do a lot of 3D printing if the product is small enough to fit on a 3D printer. Larger things take different types of prototyping processes, but I've always liked to work with my hands and do lots of prototypes.

**This is Ray.**

### DESCRIBE YOUR APPROACH FOR DESIGNING A PRODUCT.

All design projects start with establishing what problem you are trying to solve then spending time on research and analysis. Once you have a point of view, brainstorm as many solutions as possible. A few ideas usually stand out and move into the development process. At this point, pen and paper comes out and concept sketches, mock-ups and prototyping begin. This process is iterative, so things start, stop and switch direction a lot before getting into engineering and manufacturing. Then, ultimately that idea is transformed into a new product.

**“DESIGNING PRODUCTS INTERNALLY DEMONSTRATES A INTENTIONAL AND PERSONAL APPROACH — THEREFORE PROVIDING AUTHENTICITY TO THE CONSUMER”**

### WHAT IS YOUR DESIGN PHILOSOPHY?

My designs all have aesthetic elements to them, but the most important thing is that the product functions right. That has always been my philosophy: not to overdo the styling or the aesthetics; make it compliment the function.

### HOW DO YOU STAY INNOVATIVE AND GROW AS A PRODUCT DESIGNER?

I continue to look at new products that I think are cool. I'm constantly looking at things that are beautiful, things that function, that solve a problem. I look to other designers for inspiration by going out and seeing what they are doing. I try keeping up with the latest manufacturing and prototyping techniques. Basically, making sure you're aware of things that are evolving and how designs are changing. It's a great way to keep an open mind.

## HOW DOES DESIGNING WITHIN GEAR AID RESULT IN QUALITY PRODUCTS?

Designing in house is great, because we know our brand best at GEAR AID. We live, sleep and eat it here. We have inhouse brand standards we've come up with. That is something we can continually reflect back on. If you were to go out and look for a product that's been designed for another brand or something that's been designed generically, when you bring it to your product line, it can look a little bit out of place. So, by controlling the design of the product internally you ensure that it has all the attributes of your brand.

## WHAT ARE THE ATTRIBUTES OF THE GEAR AID BRAND?

For GEAR AID, it's multipurpose, it's beautiful, and it's durable.

## WHAT MAKES GEAR AID UNIQUE FROM OTHER BRANDS?

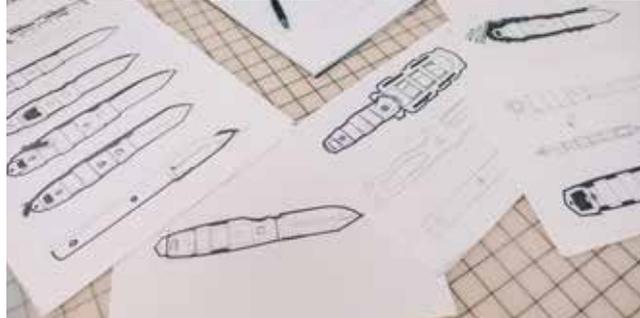

We've got such a diversity of products. When I came here, I didn't know anything about adhesives or about tapes or about waterproofing. So, what's different about GEAR AID is we're constantly learning. I've had to learn about a lot of new technologies and new products since I've been here. Also, I've had the opportunity to work on some new products that fit into the Adventure Tools category and build that out.

## DESCRIBE HOW THE NEW CAMP CARABINER LINE DEVELOPED AT GEAR AID.

The Camp Carabiner was originally designed to hang our LED lighting products. Then after we figured out how to hang it, we were inspired to expand the scope of the project. So, we decided to try and hang other things and basically took the concept and expanded it.

## WHY IS THE CAMP CARABINER AND THE NEW ADVENTURE TOOLS A SUITABLE ADDITION TO THE GEAR AID PRODUCT LINE?

It doesn't just serve our lighting products. With the Camp Carabiner, we can hang a backpack, speaker, or hang other products on a camp line. It was a unique project in that it actually got bigger and better as we went along. We even added the tensioner and a paracord, and so we created a whole new category for Adventure Tools. It took a couple of years to complete this project. We wanted to make a family of products. We solved problems that existed inside the camp situation and brought four new products to market instead of just a single product.

“THE ATTRIBUTES  
FOR GOOD DESIGN  
ARE: MULTIPURPOSE,  
BEAUTY &  
DURABILITY”

### HOW DO YOU SEE DESIGN GROWING WITHIN GEAR AID AND THE WORLD IN GENERAL?

My hope is that product design becomes a very important part of the GEAR AID brand. Design is something that can drive us forward into the future, by looking at new technologies, keeping in tune with the new products that are coming out, and staying competitive. I see design becoming more important for every brand, not just GEAR AID. There're a lot of things that need to be designed and design thinking can improve not only products at GEAR AID, but they can help solve bigger problems.

### HOW DOES SUSTAINABILITY AND ENVIRONMENTAL IMPACT MOTIVATE YOU IN TERMS OF YOUR WORK AS A PRODUCT DESIGNER?

"Sustainability" is the new buzz word right now and we're in the process of defining what it means for GEAR AID. Definitely in the long term it's us continuing to look at our supply chain and trying to make it cleaner and better. To make sure workers are treated fairly and that the materials that go into our products are safe. For us at GEAR AID, it's a work in progress.

### OUTSIDE OF WORK, WHAT IS YOUR FAVORITE ACTIVITY?

Probably kayaking and canoeing. I like being on the water. There is something peaceful about it. I also like the challenge of getting from point A to point B. Not only is it relaxing, but also interesting to figure out how to do it efficiently, so that's kind of the intriguing side of it.

**Ray's love for design and the outdoors echoes the sentiments of the GEAR AID team. By designing from within, we seek out challenges and solve problems. We do this by developing innovative tools that keep the adventure going from the backyard to the mountaintop. Check out the latest GEAR AID Adventure Tools and stay tuned for more cool things we're launching in the coming months.**
