WORKBOOK
TRAIL RUNNING

SPRING_SUMMER 2026

Dear partners,

For 100 years, LOWA has been producing high-quality outdoor shoes for the perfect experience in nature. Our company has always stood for the finest quality, perfect fit, comfort, top functionality and an innovative spirit. These values are incorporated into every area of product development, which has enabled LOWA to evolve from a specialist in mountain footwear to a global outdoor expert.

In 2023, we entered the trail running market with our first trail running collection and have since established a successful presence in this dynamic and fast-paced product category. This athletic product family marks yet another milestone in our product development and was a logical next step for the company.

With the LOWA trail running segment, we combine our many years of experience in designing grippy outsoles, creating a perfect rolling motion and delivering exceptional comfort with a new field of application. For over two

years, we have been producing impressive trail running shoes, which, as always, are developed at our headquarters in Jetzendorf, Bavaria. The new models have been specially designed for challenging terrain, offering outstanding performance through excellent grip, protection and stability.

Thank you very much for your loyalty and the consistently good, collaborative partnership. I wish you all the best and a successful season!

Yours sincerely,
Alexander Nicolai

ADVENTURE UNFOLDS WITH YOU.

Our Mission.

WE CONNECT WITH OUR AUDIENCE ON AN EMOTIONAL LEVEL.

CONNECTING OUR PRODUCTS THROUGH ONE UNIFIED SPIRIT.

TREKKING. LOWA EXPLORER.

TRAIL RUNNING. SKYTERRA.

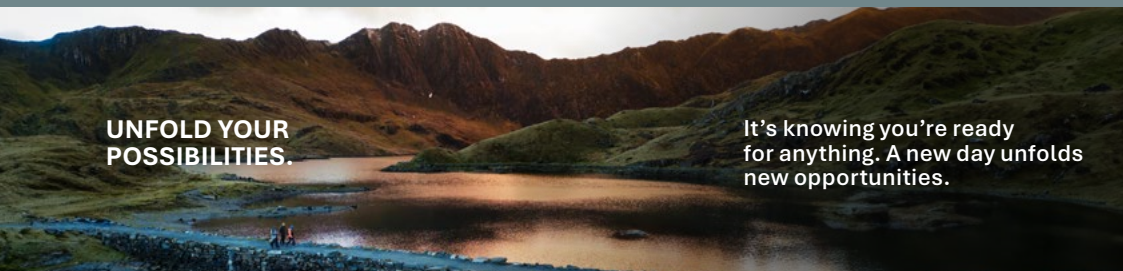

UNFOLD YOUR JOURNEY.

It starts with a single step, and turning one step into thousands.

HIKING. LIGHT HIKING. VENTIERRA.

TRAVEL & WALKING. KALOYA VENT.

UNFOLD YOUR POSSIBILITIES.

It's knowing you're ready for anything. A new day unfolds new opportunities.

KIDS. WANDAX.

KIDS. TRAILUX.

UNFOLD YOUR IMAGINATION.

It's where the wild was made for those who dream big - no matter how small the step.

MOUNTAINEERING. CERVINO.

MOUNTAINEERING. CERVINO.

UNFOLD YOUR AMBITION.

It's where a step can turn base camps into summits and a challenge into success.

Our Story.

It's the idea that growth and discovery happen when you actively engage with a situation or place. It's real experiences and their deeper meanings that don't

just happen passively - they unfold and evolve as you immerse yourself in them, take action, and commit to the journey and adventure, your way.

TECHNOLOGIES

LOWA® TRAC® Sole

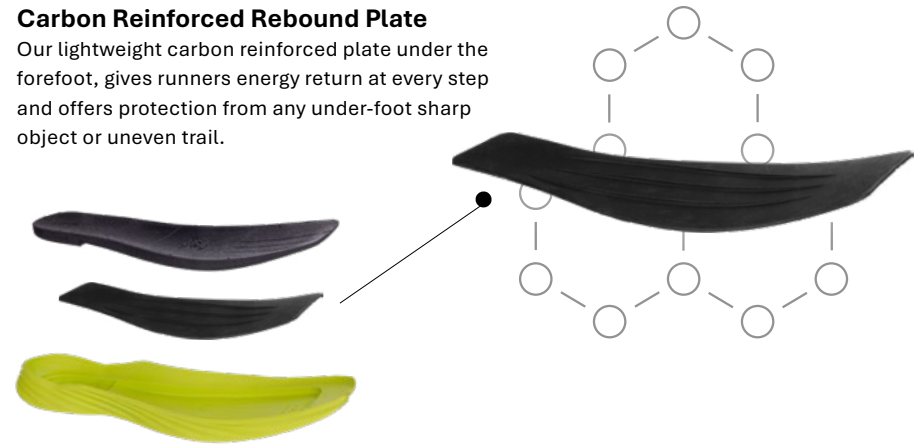

The LOWA® TRAC® sole system and the sticky rubber compound provides guaranteed traction, in wet or dry conditions. The quantity, shape and size of the lugs have been adapted to different types of terrain and thus provide the best possible grip on any terrain.

- Traction
- Reaction
- Agility
- Control

Carbon Reinforced Rebound Plate

Our lightweight carbon reinforced plate under the forefoot, gives runners energy return at every step and offers protection from any under-foot sharp object or uneven trail.

REPTEx® SPORT

The stable and robust coating preserves the upper from damage by scree and sharp rocks, while reducing the overall weight for even better performance.

Anatomical Ankle Lines

Support is delivered through our unique asymmetrically shaped upper edge which precisely reflects the ankle's anatomy. The lateral reinforcement prevents pressure points and ensures total freedom.

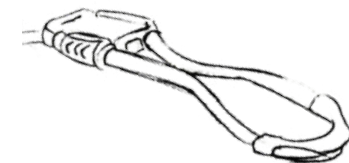

GORE-TEX Invisible Fit Technology

This innovative technology attaches the GORE-TEX lining directly to the upper material. It eliminates wrinkles and kinks so that the footwear provides perfect comfort. A single-section fabric upper eliminates the need for stitching. This feature reduces friction and skin irritations. Thanks to the consciously puristic use of material, outdoor athletes can enjoy footwear that offers a minimum amount of weight and a maximum amount of breathability.

Speed Lace

This system enables laces to be quickly and individually adjusted. Shoe wearers can also easily slip in and out of their footwear with the system's help. The laces run smoothly through the ample eyelets. The lower eyelets can also be adjusted.

DYNEVA

The sophisticated polymer compound DYNEVA has an excellent cushioning level. It absorbs the forces that occur during heel strike and provides a dynamic and efficient rebound due to its structure. This unique midsole compound reduces the weight to a minimum.

Heel Stabilizer

As a firm support element, an anatomically shaped heel counter increases stability in the area of the heel and ensures a secure fit through the entire track.

GLOSSARY

LININGS

GORE-TEX

No matter whether you are scaling a steep mountain or strolling from café to café along chilly city streets of town – GORE TEX footwear will always keep the feet pleasantly dry. Your footwear will always be waterproof and provide optimal breathability.

TEXTILE LINING

A textile lining is pleasantly lightweight. The textile material is durable, easy to care for and comfortable.

OUTSOLES

VIBRAM

Vibram has been one of the leading brands of high-quality soles for many years.

FOOTWEAR STIFFNESS

VERY FLEXIBLE

Footwear labelled “very flexible” has remarkably little rigidity. This footwear is characterised by exceptionally soft rolling properties.

MIDSOLES

LOWA® DYNAEVA

The midsole made of super light EVA foam ensures optimum cushioning and a high rebound effect over the entire length of the shoe. Sometimes bio-based materials such as sugar cane are also used.

LOWA® DYNATPE

The nitrogen-injected LOWA® DYNATPE midsole is characterised by its low weight, direct response and high rebound effect.

LOWA TOE EXTRA

Kids 12 mm | Adults 15 mm

LOWA recommends based on the foot length (mm) a toe extra of 15 mm for adults (12 mm for kids). Due to individual foot shapes or preferences in fit this recommendation may vary.

The foot length (mm) is a recommendation of LOWA, which is based on scientific findings.
